# About Safe-D Fire Fixings

Having invented the first fire-rated clips that could be fixed to substrates, or in PVC trunkings, D-Line acknowledge how cable management can literally be a matter of life and death in fire conditions, requiring an uncompromising approach to installations.

We respect how specifiers need fire-tested solutions, ensuring that cables always maintain their performance and will not drop to create potentially fatal entanglements.

D-Line appreciate also that installers of surface-mounted cables need reliable fixing-systems that are easy-to-use and versatile, giving assured compliance and peace of mind to all stakeholders.

At D-Line we offer innovative ranges that uniquely satisfy regulatory and best practice requirements. Our products have been designed after extensive research and development, with technical features and installer benefits that deliver outstanding value and quality.

## Safe-D U-Clips - Fully tested & certified... Clip & Comply

**U-Clip 50**

**U-Clip 30**

**U-Clip 40**

**Red U-Clip 30**

- Fire tested. Certified for 2 hours at 970°C
